

# TNReady Grades 3–5 Mathematics

## 2016–17 School Year

### Table of Contents

- **Overview of Grades 3–5 Mathematics Testing Structure**

This provides a snapshot of the structure of the math assessment, including a range of the number of items students can expect to see in each subpart of the TNReady assessment.

- **Grades 3–5 Mathematics Blueprints**

This provides further information for each specific grade level about which strands of standards will be addressed on the subparts of the assessment, as well as a range of number of items and score points. This section also links to the current standards, which you can find [here](#).

- Grade 3
- Grade 4
- Grade 5

- **TNReady Grades 3–5 Mathematics Calculator Policy**

This section offers detailed information about the use of calculators on TNReady assessments, as well as an example list of permitted and prohibited types of calculators.

- **Grades 5 Mathematics Reference Sheet**

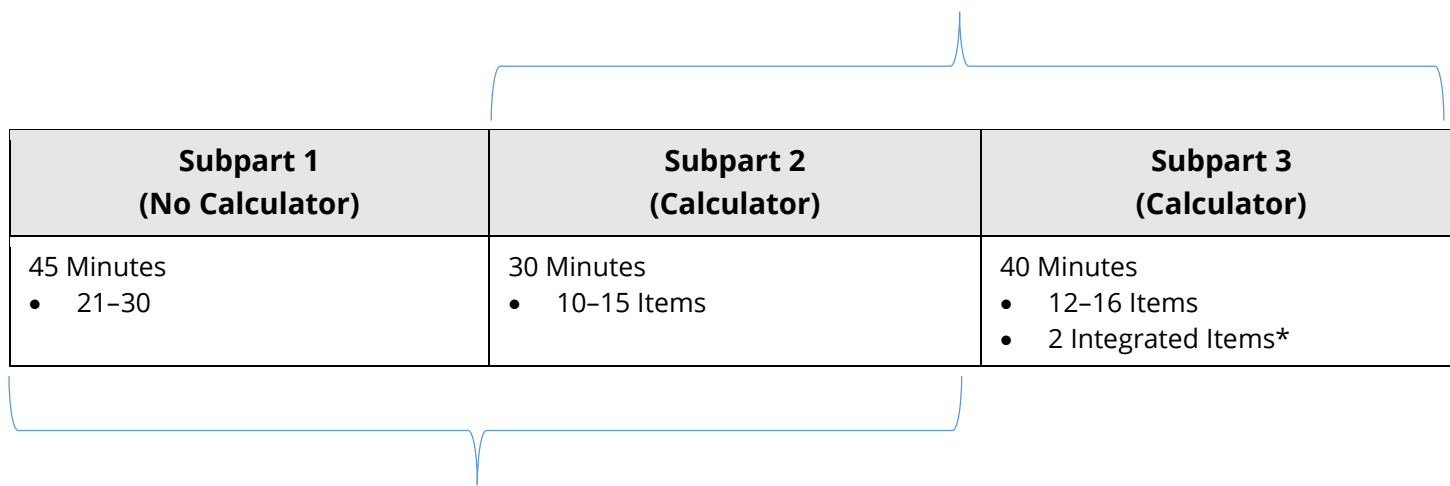

The math assessment will allow reference sheets for all students in grades five through high school. This section contains the reference sheet for grade 5.

## Overview of Grades 3–5 Mathematics Testing Structure

As in the past, each year the state assessment includes both operational and field test items.

The testing structure outlined below reflects both the number of operational assessment items and the number of field test assessment items.

For scheduling purposes, subparts can be combined.

<b>Subpart 1 (No Calculator)</b>	<b>Subpart 2 (Calculator)</b>	<b>Subpart 3 (Calculator)</b>
45 Minutes • 21–30	30 Minutes • 10–15 Items	40 Minutes • 12–16 Items • 2 Integrated Items*

For scheduling purposes, subparts can be combined.

*\*Integrated Items: 4–6 point questions that ask students to assimilate information from multiple grade-level domains. They may require background knowledge from previous grades. For 2016–17, both integrated items are field test items.*

## Grades 3–5 Mathematics Blueprints

The blueprints reflect only operational assessment items.

In grades 3–8 mathematics, approximately 70 percent of the assessment items gauge student mastery on major work of the grade. Approximately 30 percent of the items gauge student mastery on supporting and additional work.

Grade 3			
	# of Items	# of Score Points	% of Test
<b>Computation with Whole Numbers</b> <ul style="list-style-type: none"> <li>**3.OA.A–Represent and solve problems involving multiplication and division.</li> <li>**3.OA.C–Multiply and divide within 100.</li> <li>3.NBT.A–Use place value understanding and properties of operations to perform multi-digit arithmetic. (A range of algorithms may be used.)</li> </ul>	10–14	12–16	24 – 27
<b>Fractions</b> <ul style="list-style-type: none"> <li>**3.NF.A–Develop understanding of fractions as numbers.</li> </ul>	4–6	5–8	10 – 13
<b>Number Relationships and Patterns</b> <ul style="list-style-type: none"> <li>**3.OA.B–Understand properties of multiplication and the relationship between multiplication and division.</li> <li>**3.OA.D–Solve problems involving the four operations, and identify and explain patterns in arithmetic.</li> </ul>	7–11	9–13	18 – 22
<b>Geometric and Measurement Concepts</b> <ul style="list-style-type: none"> <li>3.G.A–Reason with shapes and their attributes.</li> <li>**3.MD.A–Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects.</li> <li>3.MD.B–Represent and interpret data.</li> <li>**3.MD.C–Geometric measurement: understand concepts of area and relate area to multiplication and to addition.</li> <li>3.MD.D–Geometric measurement: recognize perimeter as an attribute of plane figures and distinguish between linear and area measures.</li> </ul>	14–21	19–23	38 – 39
<b>Total</b>	35–52	*50–60	100

*\*All assessments must have a minimum of 50 score points.*

*\*\*Clusters with asterisks indicate major content of the grade.*

Grade 4			
	# of Items	# of Score Points	% of Test
<b>Computation with Whole Numbers</b> <ul style="list-style-type: none"> <li>**4.NBT.B–Use place value understanding and properties of operations to perform multi-digit arithmetic.</li> <li>**4.OA.A–Use the four operations with whole numbers to solve problems.</li> </ul>	10–13	11–15	22–25
<b>Fractions</b> <ul style="list-style-type: none"> <li>**4.NF.A–Extend understanding of fraction equivalence and ordering.</li> <li>**4.NF.B–Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.</li> <li>**4.NF.C–Understand decimal notation for fractions, and compare decimal fractions.</li> </ul>	12–17	15–19	30–32
<b>Number Relationships and Patterns</b> <ul style="list-style-type: none"> <li>4.OA.B–Gain familiarity with factors and multiples.</li> <li>4.OA.C–Generate and analyze patterns.</li> <li>**4.NBT.A–Generalize place value understanding for multi-digit whole numbers.</li> </ul>	8–12	10–14	20–23
<b>Geometric and Measurement Concepts</b> <ul style="list-style-type: none"> <li>4.MD.A–Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit.</li> <li>4.MD.B–Represent and interpret data.</li> <li>4.MD.C–Geometric measurement: understand concepts of angles and measure angles.</li> <li>4.G.A–Draw and identify lines and angles, and classify shapes by properties of their lines and angles.</li> </ul>	8–10	8–12	16–20
<b>Total</b>	38–52	*50–60	100

*\*All assessments must have a minimum of 50 score points.*

*\*\*Clusters with asterisks indicate major content of the grade.*

Grade 5			
	# of Items	# of Score Points	% of Test
<b>Computation with Whole Numbers and Decimals; Evaluating Expressions</b> <ul style="list-style-type: none"> <li>5.OA.A–Write and interpret numerical expressions.</li> <li>**5.NBT.B–Perform operations with multi-digit whole numbers and with decimals to hundredths.</li> </ul>	8–10	8–12	16–20
<b>Fractions</b> <ul style="list-style-type: none"> <li>**5.NF.A–Use equivalent fractions as a strategy to add and subtract fractions.</li> <li>**5.NF.B–Apply and extend previous understandings of multiplication and division to multiply and divide fractions.</li> </ul>	11–15	13–17	26–28
<b>Number Relationships and Patterns</b> <ul style="list-style-type: none"> <li>5.OA.B–Analyze patterns and relationships.</li> <li>**5.NBT.A–Understand the place value system.</li> </ul>	7–9	7–11	14–18
<b>Geometric and Measurement Concepts</b> <ul style="list-style-type: none"> <li>5.MD.A–Convert like measurement units within a given measurement system.</li> <li>5.MD.B–Represent and interpret data.</li> <li>**5.MD.C–Geometric measurement: understand concepts of volume and relate volume to multiplication and to addition.</li> <li>5.G.A–Graph points on the coordinate plane to solve real-world and mathematical problems.</li> <li>5.G.B–Classify two-dimensional figures into categories based on their properties.</li> </ul>	12–18	16–20	32–34
<b>Totals</b>	38–52	*50–60	100

*\*All assessments must have a minimum of 50 score points.*

*\*\*Clusters with asterisks indicate major content of the grade.*

# TNReady Grades 3–5 Mathematics Calculator Policy

## Central Beliefs

The TNReady calculator policy is based on two central beliefs:

- 1) Calculators are important tools and, in order to be ready for career and college, students need to understand how to use calculators effectively.
- 2) In order to demonstrate mastery of the mathematics standards, students must demonstrate many skills without reliance on calculators.

**Therefore, at all grade levels and in all courses, the math assessment will include both calculator permitted subparts and calculator prohibited subparts.**

- There will be one calculator prohibited subpart and two calculator permitted subparts at all grade levels.
- Information on the types of questions on the calculator prohibited section of TNReady can be found ([here](#)).

## Rationale

Calculator functionalities should align with the mathematics in each grade band. In grades 3–5 mathematics, our state standards focus on **solidifying** a student’s computational fluency with whole numbers. Students are also **developing** an understanding of fractions and beginning the process of developing computational fluency with fractions. Students should not have calculator functionalities available to them for concepts that are in the developmental stage.

As stated within our central beliefs, students should have the opportunity to interact with technology and the opportunity to demonstrate critical thinking and problem solving with the aid of a calculator. However, in order to provide an equitable assessment experience for all Tennessee students, the type of calculator used by students should be consistent in functionality. As fractional understanding is in the developmental phase over this grade band, students do not need a fraction key—they need to be able to demonstrate their conceptual understanding of fractions and operations with fractions. Thus, third through fifth grade students will be allowed a four-function calculator, which does not include any of the prohibited functionalities on the calculator permitted subparts, such as fractions.

## Test Administration Guidelines

- It is the responsibility of the test administrator to ensure the regulations outlined in this policy pertaining to calculator use are followed.
- All memory and user-entered programs and documents must be cleared or removed before and after the test.
- A student may use any grade-band specific permitted calculator on the calculator permitted subparts.
- Students should have access to no more than one handheld calculator device for calculator-permitted subparts.
- As we transition to online in future years, students will have access to practice with the same calculator functionalities that will be available on the operational assessment on both the item sampler and the practice tests.

## **Handheld Calculator Types**

For grades 3–5, students may use any four–function calculator, which does not include any of the prohibited functionalities. *Please note: This is not an exhaustive list of calculator types, and students should be familiar with particular functions at the appropriate grade level.*

### **Examples of permitted calculators:**

- TI-108
- Casio HS 4 Basic
- Sharp ELSI Mate EL-2405A

### **Examples of permitted functionalities:**

- Addition
  - Subtraction
  - Multiplication
  - Division
  - Square root ( $\sqrt{\phantom{x}}$ )
  - %
- 

### **Examples of prohibited calculators:**

- TI-15
- TI-30
- Casio FX260
- Sharp EL344RB
- TI-84 plus family
- TI-NSpire (non-CAS) and TI-NSpire–CX (non-CAS)
- TI-89
- TI-NSpire (CAS version)
- HP-40G
- Casio CFX-9970

### **Examples of prohibited functionalities:**

- Fraction manipulation
- Fraction to decimal conversions/decimal to fraction conversions
- Square key ( $x^2$  or  $x^y$ )
- Pi( $\square\square$ )
- Graphing capability
- Data entry
- Matrices
- Regression
- Trigonometric functions (sine, cosine, tangent)
- Logarithm (log and/or ln) and exponential functions ( $a^x$  and/or  $e^x$ )
- Any calculator with CAS (computer algebra system) capabilities (including any programs or applications)
- Wireless communication capability
- QWERTY keyboard

- Cell phones, tablets, iPads, etc.

## Grades 5 Mathematics Reference Sheet

The math assessment will allow reference sheets for all students in **grades five through high school**. The reference sheets are designed to match the intent of our current state standards in math. The language of the standards in grades 3 and 4 does not necessitate a reference sheet.

Math Reference Sheet, Grade 5	
	1 mile = 5,280 feet 1 mile = 1,760 yards
	1 pound = 16 ounces 1 ton = 2,000 pounds
	1 cup = 8 fluid ounces 1 pint = 2 cups 1 quart = 2 pints 1 gallon = 4 quarts 1 liter = 1000 cubic centimeters
